

# Annual Comprehensive Visit for our Patients with Medicare or Medicare Advantage

To manage your health needs effectively, we believe that you should have a comprehensive visit every year.

An **Annual Comprehensive Visit** includes a thorough review of risk factors or history that might impact your health, managing your current and ongoing health conditions and medications and providing you with a written care plan.

If you are covered by Medicare, you are eligible for an **Annual Wellness Visit**. This is a preventative visit, with specific, limited benefits and coverage defined by Medicare.

While the Annual Wellness Visit is a valuable service, we believe that doing it as part of an Annual Comprehensive Visit is a more effective way to help you manage your overall health.

## Annual Comprehensive Visit

**Frequency:** Every 12 months

**Cost:** Charge is based on your co-pay parameters, and is subject to your benefits and deductible

### Services Covered:

- Medicare health risk assessment
- Family and medical history
- Health maintenance and disease management treatment plan
- Vision screening
- Referrals for preventative screening
- Review and manage ongoing/ chronic medical issues
- Review and manage any new or acute health problems
- Develop your plan of care including managing refills, labs and other tests for the upcoming year
- Exam as appropriate

## Medicare Annual Wellness Visit

**Frequency:** Every 12 months

**Cost:** No charge unless you discuss items outside of the defined benefits

### Services Covered:

- Medicare health risk assessment
- Family and medical history
- Health maintenance screening
- Vision screening
- Referrals for preventative screening
