

# The Everett Clinic

For the whole you.

## Pediatric Physical Therapy

- \*Our physical therapy department at the Everett Clinic is available to work with pediatric patients from birth through teenage years.
- \* We have a comprehensive outpatient physical therapy center with the following equipment suitable for children:
  - Baby treatment room with mats, bolsters, and infant equipment.
  - Treadmill, Shuttle (squat press), Recumbent Bicycles
  - Wii, Balance Beams, Rebounders, Stairs, Trampolines
  - Large mat tables and independent treatment rooms
- \* We have the capacity to treat children with the following diagnoses:
  - Babies with torticollis / plagiocephally
  - Children and infants with developmental delay
  - Children with orthopedic impairments (ie: s/p fracture or surgery)
  - Children with neurological impairments (ie: SCI, TBI, s/p brain tumor)
- \* We take most insurances, including Molina and Group Health
- \* We are able to see patients multiple times per week, as recommended by a physician.
- \* We are working towards an agreement with a local pool to provide aquatic therapy for our patients.
- \* We are able to provide consistent and thorough documentation for follow-up appointments at Seattle Children's.
